

Over 250 students from across the nation will participate in University of Miami's hackathon, UHack, on Saturday, **October 28th to Sunday, October 29th**. Over the course of **24 hours**, students will build innovative projects, meet with like-minded hackers, and network with top tech companies like yours.

At UHack, we hope to provide a comprehensive recruiting and branding experience to our sponsors. Here's what your company can do at our event:

Connect & Recruit.

Hackathons are the perfect place for your organization to work with motivated and talented future developers and designers. You will also have the opportunity to access students' résumés and GitHub portfolios. And by watching a project evolve over a hackathon, you can get a much better picture of a candidate.

Increase your brand's presence.

You can provide students with a lasting impression of your company's talented engineers and quality services through mentoring students one-on-one, making your API available to students during UHack, and giving technical talks. These experiences will leave a lasting impact on students well past graduation.

UNIVERSITY OF MIAMI
COLLEGE of
ENGINEERING

UHack is primarily interested in monetary support to help support events. If you are interested in making an in-kind donation, please see the contact information below. All donations are tax-deductible to the extent allowed by law and go directly towards the planning and execution of convention events.

Feel free to contact us with questions about sponsorship opportunities and benefits.

Sponsorship Tiers	Cat 1	Cat 2	Cat 3	Cat 4	Cat 5 *
